# EG – continuous improvement means everything

Through one operating model EG seeks to streamline customer service and software development processes to ensure that we create maximum value for our customers at all times. It is a process of continuous improvement which has become a part of our DNA.

# What about EG Xellent and EG Zynergy?

- EG Zynergy continues the journey towards multi-utility and grid support.
- EG Xellent365 has come a long way over the last years and we are able to take increasing advantage of the Microsoft 365 platform.
- New and exciting partnerships
- New products in collaboration with our recent acquisitions
- All of the above to support and increase the digitization of the Nordic Utility sector and to support our customers in creating value for their customers.

# ANVÄNDARTRÄFFEN 2022

In the light of green Energy transition and the Energy crisis

- We seek to update
- We seek to inspire
- We seek to provoke
- We seek to create networks and communities
- We seek to create the best conditions for knowledge sharing and debate

Let's go further
